

Optimization

Grading

Zsófia Lendek

26 February 2024

$$\text{Grade}_{in} = 0.6\text{Grade}_{pe} + 0.4\text{Grade}_{ex} + \text{Points}_{extra}$$

Lectures

Attending at least 7 lectures is compulsory.

Lab exercises

Participation in the exam is conditioned by completing all laboratory assignments. Every assignment must be completed during laboratory hours, and will be checked on the spot. The assignment is considered performed and the presence registered only if an acceptable solution is provided. In exceptional cases, an unfinished laboratory in the current week may be continued in next week. Attention, however: according to the ECTS rules one can recover **at most** 2 laboratories during the semester and at most 2 laboratories in the examination period, before the exam. If more than 4 unfinished laboratories are accumulated, the case is considered irrecoverable, and the student has to sign the contract for the whole course in the next year.

Grade_{pe}

- The partial exam will consists of questions and problems related to the course material and lab exercises.
- It is graded from 0 to 10.
- It will take place in week nr. 8.

Grade_{ex}

- The exam will consists of questions and problems related to the course material and lab exercises.
- It is graded from 0 to 10.
